Using Field Notebooks in a Freshmen Biology Laboratory Course

Rachel Ratcliff

Department of Biological and Health Sciences, Texas A&M University – Kingsville, 920 University Blvd., MSC 158, Kingsville TX 78363 USA
(kfrer00@tamuk.edu)

The field notebook is being resurrected and used as a tool to engage students by improving their observational skills and making them more aware of the natural world in which they live. This presentation documents the use of the time-honored field notebook in a freshmen biology laboratory course. The format and content of the field notebook will be given as well as student feedback, on the use of the field notebook. I am also using the field notebook in my non-majors Biology course with good results.

Mission, Review Process & Disclaimer

The Association for Biology Laboratory Education (ABLE) was founded in 1979 to promote information exchange among university and college educators actively concerned with teaching biology in a laboratory setting. The focus of ABLE is to improve the undergraduate biology laboratory experience by promoting the development and dissemination of interesting, innovative, and reliable laboratory exercises. For more information about ABLE, please visit http://www.ableweb.org/.

Papers published in Tested Studies for Laboratory Teaching: Peer-Reviewed Proceedings of the Conference of the Association for Biology Laboratory Education are evaluated and selected by a committee prior to presentation at the conference, peer-reviewed by participants at the conference, and edited by members of the ABLE Editorial Board.
