EdTech Toolkit: Creating Browser Based Interactive Keys and Documents in Class

A. Daniel Johnson

Wake Forest University, Department of Biology, 1834 Wake Forest Rd., Winston-Salem NC 27106 USA
(johnsoad@wfu.edu)

Interactive browser-based documents have many uses in biology teaching: branching keys, If/Then narratives, ecosystem summaries, etc. Participants will learn how to use two free cross-platform tools to create interactive HTML documents they can view with any browser. Twine is a standalone cross-platform program in which create individual pages of text and media, then link them using page name tags to create the desired narrative paths. jQuery Mobile is a feature-rich Javascript framework used in interactive mobile sites that easily adapts to classroom use. jQuery Mobile is a very simple, approachable introduction to HTML coding because it uses cut-and-paste blocks of HTML. It is well within the capabilities of novices, and students can continue building on what they learn. Neither tool requires IS support, so they can be incorporated into a course with minimal effort. Workshop participants will leave with two starter HTML documents, one built in Twine, and one with jQuery Mobile. (Participants should bring their own laptops to work on documents.)

Mission, Review Process & Disclaimer

The Association for Biology Laboratory Education (ABLE) was founded in 1979 to promote information exchange among university and college educators actively concerned with teaching biology in a laboratory setting. The focus of ABLE is to improve the undergraduate biology laboratory experience by promoting the development and dissemination of interesting, innovative, and reliable laboratory exercises. For more information about ABLE, please visit http://www.ableweb.org/.

Papers published in Tested Studies for Laboratory Teaching: Peer-Reviewed Proceedings of the Conference of the Association for Biology Laboratory Education are evaluated and selected by a committee prior to presentation at the conference, peer-reviewed by participants at the conference, and edited by members of the ABLE Editorial Board.
