Pedagogy for the People: The Impact of TA-centered Equity and Inclusion Training on Student Learning Outcomes

Althea Rene’ Miller

University of Wisconsin –Madison, Department of Integrative Biology, 233 Noland Zoology Building, 250 N Millis St, Madison WI 53706 USA
(armiller6@wisc.edu)

In the Fall of 2016, I joined the coordinators of Introductory Biology 151/152 at the University of Wisconsin –Madison as an Educational Specialist. My primary focus was the implementation of TA-centered equity and inclusion training for the purpose of better equipping TAs to respond to students’ need for an inclusive learning environment (i.e., in-depth understanding of racial, ethnic, gender, socioeconomic differences) and adopt empathic pedagogical practices (e.g., facilitating in-class activities designed to engage multiple learning modalities, using gender-inclusive language, etc.). In this mini workshop, we will explore the TAs’ concerns (e.g., How should TAs address the post-election fears of minoritized students?); I will detail the components of these trainings, (e.g., brave space/courageous conversations, Theatre of the Oppressed methodology); and we will discuss the impacts of TA trainings on the TAs themselves, as well as on the students enrolled in the course. Implications for future practice in biology education will also be shared. Keywords: teaching assistants, TA, pedagogy, equity and inclusion training

Mission, Review Process & Disclaimer

The Association for Biology Laboratory Education (ABLE) was founded in 1979 to promote information exchange among university and college educators actively concerned with teaching biology in a laboratory setting. The focus of ABLE is to improve the undergraduate biology laboratory experience by promoting the development and dissemination of interesting, innovative, and reliable laboratory exercises. For more information about ABLE, please visit http://www.ableweb.org/.

Papers published in Tested Studies for Laboratory Teaching: Peer-Reviewed Proceedings of the Conference of the Association for Biology Laboratory Education are evaluated and selected by a committee prior to presentation at the conference, peer-reviewed by participants at the conference, and edited by members of the ABLE Editorial Board.
