Using an Audience Response System to Engage Introductory Science Students in Lecture

Karin E. Readell

UMBC, Dept. of Geography & Environmental Systems
Baltimore, MD 21250

Abstract

This poster presents the implementation of Turning Point Technologies Audience Response System in the lecture portion of Science 100 (an introductory lab-based science class for non-majors). Advantages and disadvantages of the use of this system will be covered, as well as initial student response and feedback.
