Evolving with Avidians

Dianne Jennings¹ and Jonathan Moore

¹Virginia Commonwealth University, Biology, 1000 W. Cary St., Richmond VA 23114 USA (dbjennings@vcu.edu)

Do your struggle to understand the randomness of mutation? Do you hear your students say 'this evolved so that...'? Or maybe they don't understand how "fitness" can cause a change in the gene pool of a population. Come and explore how Avidians may be able to help your students with these concepts and how Avidians can be used for students to design their own research questions about evolution. We will be using a virtual online evolution (not a simulation though) to explore the potential of these unique organisms. Be prepared to fall in love with them.

Keywords: evolution, avidians

Mission, Review Process & Disclaimer

The Association for Biology Laboratory Education (ABLE) was founded in 1979 to promote information exchange among university and college educators actively concerned with teaching biology in a laboratory setting. The focus of ABLE is to improve the undergraduate biology laboratory experience by promoting the development and dissemination of interesting, innovative, and reliable laboratory exercises. For more information about ABLE, please visit http://www.ableweb.org/.

Papers published in Tested Studies for Laboratory Teaching: Peer-Reviewed Proceedings of the Conference of the Association for Biology Laboratory Education are evaluated and selected by a committee prior to presentation at the conference, peer-reviewed by participants at the conference, and edited by members of the ABLE Editorial Board.
